Software Developer

Software developer with experience in web frontend and mobile development, creating and implementing applications focused on usability, performance, and code organization. I worked at the Apple Developer Academy on collaborative projects, applying best architectural practices, agile methodologies, and integration between frontend and APIs. I have experience with TypeScript, React, and Swift, as well as familiarity with CI/CD pipelines.

EXPERIENCE

APPLE DEVELOPER ACADEMY

Brasília, DF | 2023 – 2024

Experience in a software development program for Apple platforms, developing mobile applications and creating functional prototypes, focusing on user experience, performance, and code quality. I implemented solutions using native Apple frameworks (UIKit, SwiftUI, CloudKit, SceneKit, ARKit, CoreData, and UserDefaults), applied architectures such as MVC, MVVM, and MVVM-C, and collaborated in agile teams (Scrum and Kanban). I participated in the adoption of CI/CD practices, including test automation and build and deployment processes.

PROJECTS

REELSTACK

Fullstack Project| Web Front-end

As part of a team, I developed a movie recommendation platform for my Computer Science graduation project, inspired by swipe mechanics and with learning based on user interactions. I implemented the front-end using TypeScript and CSS, integrated the project's own API, and developed the movie search system, ensuring performance, code organization, and a good user experience.

HERMES TRACKING

Mobile Application

I developed an application with my team for centralizing and tracking orders, with real-time updates and automatic notifications. The project was carried out during my participation in the Apple Developer Academy, where I implemented the application's navigation and architecture using UIKit, following the MVC pattern and the Coordinator for better organization and scalability.

EDUCATION

UNIVERSIDADE CATÓLICA DE BRASÍLIA

Bachelor's Degree in Computer Science | 2022 – 2025
Brasília, DF

SKILLS AND CERTIFICATIONS

Technologies: HTML, TypeScript, APIs Rest, React, Tailwind CSS, Swift, UIKit, SwiftUI, Xcode, XCTest, Figma, Git, Github
Architectures and Patterns: MVC, MVVM, MVVM-C, Coordinator
Methodologies and Practices: Scrum, Kanban, CI/CD
Certifications: App Development with Swift Certified User (Apple), EF Set English Certificate (C2)
Languages: English: Advanced
